YOSUKE NISHI : ATTN: APPLICATION BRANCH
SERIAL NO: NEW PATENT APPLICATION :
FILED: HEREWITH
FOR: REMOTE CONTROL SYSTEM :

PRELIMINARY AMENDMENT

ASSISTANT COMMISSIONER OF PATENTS
WASHINGTON, DC 20231

SIR:

Prior to examination on the merits, please amend the above-identified patent application as follows:

IN THE SPECIFICATION

Please replace the paragraph at page 30, line 20 through page 31, line 5, with the following text:

Thus, in the remote control system relating to this embodiment aspect 3, since the command fetch request is set in the wait state, it makes possible to promptly transmit command information from the user to the electronic equipment. Furthermore, since the user can promptly receive the execution results at the electronic equipment, in particular, when it has been determined by analyzing state information that there is a problem and notification of the analysis results has been made to the user's terminal, the user can promptly send the appropriate command information and receive the execution results in order to solve the problem.

REMARKS

Favorable consideration of this application as presently amended and in light of the following discussion is respectfully requested.

Claims 1-13 are present in this case.

This Preliminary Amendment is filed to correct an inadvertent typographical error in the specification at page 31, line 1 to delete "condition" and insert --state--.

Accordingly, examination on the merits of Claims 1-13 is believed to be in order, and an early and favorable action is respectfully requested.

Respectfully submitted,

OBLON, SPIVAK, McCLELLAND,
MAIER & NEUSTADT, P.C.
